

The main objective of this Conference:

- To provide a comprehensive understanding of emerging technologies such as Artificial Intelligence, Blockchain, IoT, and Cloud Computing, and how they can be leveraged to accelerate business value.
- To showcase real-world case studies and success stories of businesses that have successfully implemented emerging technologies to drive growth, efficiency, and innovation.
- To discuss the challenges and opportunities that businesses face in adopting and implementing emerging technologies, and how to overcome these challenges.
- To provide a forum for students to showcase their research findings, ideas, and innovations related to emerging technologies and their impact on business value.
